DHANUSH V

Cloud & DevOps Engineer | AWS | Docker | Kubernetes | Terraform | CI/CD | SRE

vdhanushyam@gmail.com 6380921601 Bengaluru, India Linkedin Github Portfolio

PROFESSIONAL SUMMARY

PROFESSIONAL SUMMARY
MCA graduate with hands-on project experience in AWS, Linux, Docker, Kubernetes, Git, Jenkins, Argo CD, Terraform, Ansible, NGINX and Bash. Familiar with containerized application deployment, Kubernetes administration, GitOps workflows, Infrastructure as Code, cloud infrastructure automation, monitoring and troubleshooting. Have practical exposure to Terraform-based infrastructure provisioning and Ansible-based server configuration and deployment. Seeking an entry-level Cloud/DevOps Engineer, AWS Engineer, Cloud Infrastructure Engineer or SRE role.

TECHNICAL SKILLS

Cloud:
AWS EC2, S3, IAM, VPC, CloudWatch, Security Groups, AWS CLI, introductory GCP exposure

DevOps & CI/CD:
Git, GitHub, Jenkins, GitHub Actions, CI/CD concepts, Argo CD, GitOps

Containers & Web
Docker, Docker Compose, Kubernetes, Minikube, NGINX, Ingress, HTTP/HTTPS

Infrastructure & OS:
Terraform, Ansible, Linux, Ubuntu, Windows, Bash scripting

Programming & Data:
Python, Flask, Tkinter, SQL, MySQL, HTML, CSS, JavaScript

Monitoring & Observability:
Prometheus, Grafana, Node Exporter, cAdvisor, AWS CloudWatch

PROFESSIONAL EXPERIENCE

Cloud & DevOps Intern — ACTE | Bengaluru 2026 | Bengaluru
- Gained hands-on practice with AWS services, including EC2, S3, IAM and VPC, through cloud infrastructure exercises.
- Practiced Linux system administration, Bash scripting, Docker containerization and Kubernetes deployment fundamentals.
- Worked with Git and GitHub for version control and explored CI/CD workflows using Jenkins and GitHub Actions.
- Practiced infrastructure provisioning concepts using Terraform and explored configuration management with Ansible.
- Gained exposure to GitOps workflows using Argo CD and web server configuration using NGINX.

PROJECTS

Cloud-Based Chaos Engineering & Infrastructure Monitoring
- Provisioned AWS infrastructure using Terraform and EC2 to support cloud-based application deployment and testing.
- Containerized applications using Docker and Docker Compose and simulated CPU, memory, disk and inode stress to evaluate infrastructure resilience.
- Automated Docker image builds and deployment workflows using GitHub Actions and Docker Hub.
- Monitored infrastructure using AWS CloudWatch and used AWS Lambda and SQS for automated workload and event processing.

Technologies: AWS EC2, Terraform, Docker, Docker Compose, GitHub Actions, Docker Hub, CloudWatch, Lambda, SQS, Linux, Bash

Cloud-Agnostic Terraform & Ansible Automation Platform
- Automated AWS and GCP infrastructure provisioning using Terraform to support multi-cloud infrastructure management.
- Configured and managed cloud servers using Ansible and dynamic inventory.
- Automated Docker and NGINX deployment using Bash scripts.
- Designed reusable infrastructure configurations to simplify provisioning and server configuration across cloud environments.

Technologies: AWS, GCP, Terraform, Ansible, Docker, NGINX, Bash, Linux

AWS Cloud Cost Estimation & Analysis
- Developed a Python and Tkinter desktop application to estimate AWS infrastructure costs based on configurable resources.
- Implemented resource-based pricing calculations and cost summaries to support cloud cost analysis.
- Built an interactive interface for configuring AWS resources and reviewing estimated costs.
- Documented project architecture, application usage and cost-estimation methodology.

Technologies: Python, Tkinter, AWS Pricing, Git, GitHub

EDUCATION

Master of Computer Applications (MCA), *Saveetha University* 2024–2026 | Chennai
CGPA: 7.65

Bachelor of Computer Applications (BCA), *VIT University* 2021–2024 | Vellore
CGPA: 6.94

CERTIFICATES

Cloud Computing Training
ACTE, Bengaluru | 2026

LANGUAGES

- Tamil
- English
