

# DHANUSH V

Cloud & DevOps Engineer | AWS | Kubernetes | SRE

✉ vdhanushyam@gmail.com ☎ 6380921601 📍 Bengaluru, India 🔗 LinkedIn 🐙 Github

## PROFESSIONAL SUMMARY

MCA graduate with hands-on experience in AWS, Linux, Docker, Kubernetes, Git, Jenkins, Argo CD, Terraform, Ansible, NGINX and Bash. Experienced in containerized application deployment, Kubernetes administration, GitOps workflows, Infrastructure as Code, cloud infrastructure, automation, monitoring and troubleshooting. Familiar with Terraform-based infrastructure provisioning and Ansible-based server configuration and deployment. Seeking an entry-level Cloud/DevOps Engineer, AWS Engineer, Cloud Infrastructure Engineer or SRE role.

## TECHNICAL SKILLS

### Cloud:

AWS EC2, S3, IAM, VPC, CloudWatch, Security Groups, AWS CLI

### DevOps:

Git, GitHub, Jenkins, CI/CD, Argo CD, GitOps, Bash

### Containers:

Docker, Docker Compose, Kubernetes, Minikube

### Infrastructure:

Terraform, NGINX, Ingress, Linux, HTTP/HTTPS

### Programming:

Python, Flask, MySQL, SQL, HTML, CSS, JavaScript

### OS:

Linux, Ubuntu, Windows

## PROFESSIONAL EXPERIENCE

### Cloud & DevOps Intern — ACTE | Bengaluru

2026 | Bengaluru

- Practiced AWS services including EC2, S3, IAM and VPC through hands-on cloud infrastructure exercises.
- Worked with Linux, Bash, Docker and Kubernetes for system administration and application deployment.
- Used Git, GitHub, Jenkins, Argo CD, NGINX and Terraform for version control, CI/CD, GitOps and Infrastructure as Code.

## PROJECTS

### Cloud-Based Chaos Engineering & Infrastructure Monitoring

DevOps project focused on simulating infrastructure failures and monitoring system behavior under different load conditions.

#### Key Highlights

- Built AWS infrastructure using **Terraform & EC2**
- Containerized workloads using **Docker & Docker Compose**
- Simulated **CPU, memory, disk and inode failures**
- Used **Lambda & SQS** for load and burst testing
- Monitored infrastructure and containers using **CloudWatch**
- Automated Docker builds and deployments using **GitHub Actions**
- Used **Docker Hub** for image versioning and rollback
- Developed supporting services using **Flask, NGINX, Linux & Bash**

**Tech Stack:** AWS EC2 · Terraform · Docker · Docker Compose · Lambda · SQS · CloudWatch · Flask · NGINX · GitHub Actions · Docker Hub · Linux · Bash

### Cloud-Agnostic Terraform & Ansible Automation Platform

Automated multi-cloud infrastructure deployment using **Terraform and Ansible**, supporting AWS and GCP through a single infra.conf configuration file.

#### Key Highlights

- Automated AWS/GCP infrastructure provisioning with **Terraform**
- Used **Ansible** for server configuration and dynamic inventory
- Automated **Docker & NGINX** installation and deployment
- Implemented infrastructure validation and lifecycle management
- Created shell scripts for **automated deployment, verification, and cleanup**
- Designed a reusable **cloud-agnostic configuration workflow**

**Tech Stack:** AWS · GCP · Terraform · Ansible · Docker · NGINX · Bash · Linux · Shell Scripting

## EDUCATION

### Master of Computer Applications (MCA), Saveetha University

2024–2026 | Chennai

CGPA: 7.59

### Bachelor of Computer Applications (BCA), VIT University

2021–2024 | Vellore

CGPA: 6.94

## CERTIFICATES

- Cloud Computing Training —  
ACTE, Bengaluru

## LANGUAGES

- Tamil
- English
